

Mr. J.W. Scofield
B&W Ref: RB-614/615
Page 2

September 12, 1991

As far as schedule, B&W will proceed with the material ordering process upon receipt of your written acceptance of this quote (Alt. #A or Alt. #B) and release to proceed. Orders for major alloy materials are targeted for placement one week following this acceptance/release; orders for remaining materials two weeks thereafter. We have located suppliers for the major alloy materials for both alternates and have promises that these materials will be delivered within 6 weeks of ordering. In order to have the burners on site in time for your Spring 92 outage* (starts 4/18/91), B&W needs acceptance/release on this quote by 9/18/91 and acceptance/release on the fabrication quote by 10/18/91.

Attached for your review, is a draft of the warranty B&W will be providing on these new burners. We plan to include it as part of our upcoming quote for shop fabrication and freight.

B&W looks forward to working with IPP on this burner replacement project. Please advise any questions or comments, as well as your decision on this quote.

Very truly yours,

Carl A. Palmberg
C.A. Palmberg
Project Manager
